

Kiran Vedante Recognized for Outstanding Contributions!

Meramec Design Engineer receives certificate of appreciation from IEEE

Cuba, Missouri, June 7th, 2016 -

Meramec Instrument Transformer Co. is proud to announce the recent accomplishment of one its Senior Design Engineers. Kiran Vedante has been recognized by the IEEE with a Certificate of Appreciation for Outstanding Contributions.

The recognition is due to Kiran's instrumental involvement in the development of IEEE Standard C57.163-2015. This guide establishes power transformer capability while under geomagnetic disturbances. Along with this certificate, Kiran has also been published in the December 2015 issue of the IEEE Electrification magazine. His article details the impact of geomagnetically induced currents (GICs) on power transformers.

Kiran has 20+ years of transformer design and development experience and has worked with many of the leading companies in the industry. Kiran holds a Master Degree in Electrical Engineering from Bombay University in Mumbai.

Kiran stated "I am honored to be recognized by the IEEE with their certificate of appreciation. Many years of hard work and research led to these contributions."

About Meramec Instrument Transformer Co:

Meramec Instrument Transformer Co. was established in 1969 and is located in Cuba, Missouri. For over 45 years, Meramec has focused on product quality, technical support, customer service, and industry leading turnaround times. Meramec products are designed, manufactured, produced, and managed completely in the U.S.A. Meramec believes in the importance of continuous improvement and being prepared for the future. Because of that, the company is ISO 9001:2008 registered, is a proud partner in the Green Supplier Network, and manufactures its products using renewable resources. Meramec's goal is to always exhibit the very highest of regard and professionalism to its customers, the public, and the environment.
