

Meramec Electrical Products **NAMED NIST MEP MANUFACTURER OF THE WEEK**

Rolla, Missouri (April 16, 2011)

The U.S. Department of Commerce's Manufacturing Extension Partnership (MEP) named Cuba based Meramec Electrical Products Company as its national Make It in America Manufacturer of the Week for November 16 – 23, 2011. The company is being featured on the national Manufacturing Extension Partnership Web Site at www.nist.gov/mep/america.cfm.

Nick Sanazaro, Meramec president, said, "There will only be 52 companies chosen nationwide, so it's a great honor to be chosen for this program."

Meramec Electrical Products Company is one of the largest manufacturers of instrument current transformers for the GLOBAL power generation, transmission and electrical distribution markets. The company excels in building the highest quality custom made product while providing the shortest turnaround time in the industry. It specializes in a broad range of instrument current transformers for a wide variety of applications including generators, power transformers, high voltage circuit breakers and outdoor-rated station post and slip-over applications.

Meramec Electrical Products was nominated for inclusion in the program by Missouri Enterprise, the company that manages the Manufacturing Extension Partnership in our state. Missouri Enterprise specialists has assisted Meramec with ISO 9001:2008 registration, market research, product design & development, energy assessments and various continuous improvement efforts to promote growth as well as the design of Meramec's new plant conducive to efficient operations.
