

MERAMEC
Instrument Transformer Co.

THE INSTRUMENT CT SPECIALISTS

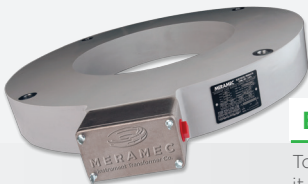

"Refined processes, skilled technicians, superior materials, and customer-focused staff are the reasons for our 99.98% quality performance rating. This is why more utilities are specifying Meramec CTs today for the sake of their equipment's reliability."

Nick Sanazaro
President, Meramec Instrument Transformer Co.

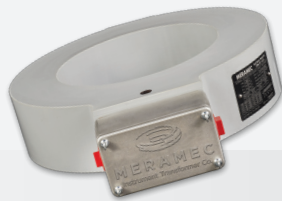

BGCT Board Mounted Generator CT

Offers a quick turnaround during a forced emergency outage.

EGCT Encapsulated Generator CT

Totally encapsulated coil, makes it ideal for harsh environments.

SBCT Outdoor Mounted Slip-Over Bushing CT

The economical solution when upgrading system protection.

DBCT Internally Mounted Dry-Type Bushing CT

Can also be installed inside a weather-tight cabinet or inside an MC switchgear compartment.

OBCT Internally Mounted Oil-Type Bushing CT

Designed to be mounted onto a high voltage bushing shank along the ground collar.

Spec the Best

**You specify the manufacturer of your bushings.
You specify the manufacturer of your relays.
Do you specify the manufacturer of your CTs?**

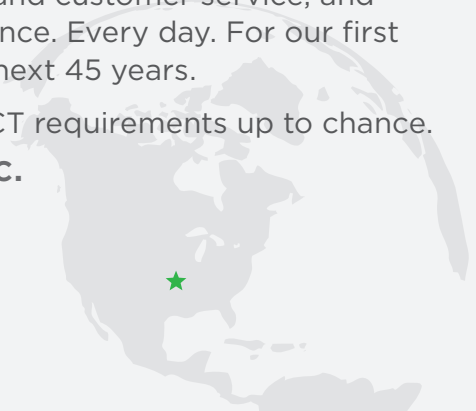

Given the current transformer's critical role in your protection scheme, you should.

Not all CTs are created equal.

- How consistent will your CTs' excitation and accuracy be over time?
- How will temperature swings over the equipment's life affect your electrical readings?
- How well does the insulation material hold up to environmental factors such as moisture and heat?
- When needed, is the CT manufacturer ready and available to support you?

Meramec is recognized for proven product quality, technical and customer service, and delivery performance. Every day. For our first 45 years and our next 45 years.

Don't leave your CT requirements up to chance.
Spec Meramec.
