

"While most current transformers may look the same on the outside, it's what's inside that counts. And when you count on performance, you can count on Meramec. I guarantee it!"

Nick Sanazaro
President Meramec Instrument Transformer Co.

Nothing is more dependable than a Meramec Current Transformer. We guarantee it. For 20 years!

Dependability starts with high-grade steel produced to our proprietary specifications, ensuring low core loss and high permeability - core to core and order to order.

Meramec stands up to the most demanding environments. Whether in-oil or above-oil, high temps or high humidity environment, our exclusive insulation system gives extra long life.

Premium refined copper magnet wire is wound over the core. Our materials and methods are not standard for all other manufacturers.

We back up our work with our premier level of testing and inspection prior to shipment. Every single Meramec CT (not just a random selection) is tested and certified to the applicable manufacturing standard.

**Why guarantee for 20 years?
Because we can, and no one else does!**

The sure way to get 20 years of "no worry" is to spec "Meramec Only," or "20 Year Guarantee."

Check our commitment to quality at MeramecUSA.com/20YearGuarantee. The Meramec 20 Year Guarantee is exclusive to our Dry-Type and Oil-Type current transformers.
