REPUTATION

**Why stake your reputation to a CT that
is not guaranteed to perform for 20 years?**

No one has a better reputation for quality Current Transformers than Meramec! We can make this claim because we are the only CT manufacturer that will back up our quality with a 20 year guarantee. Our proprietary grain-oriented electrical steel provides reliability and longevity to perform at the highest levels, while ensuring low core loss and high permeability. Our exclusive insulation system provides added life, in-oil or above oil, or in high temp and high humidity environments. Most importantly, **every Meramec CT is tested, traceable, proven, and certified** to the applicable standard.

You won't find this with other CT manufacturers.

**Why guarantee for 20 years?
Because we can— and no one else does!**

Spec 20 Year Guarantee.
Spec Meramec.

MERAMEC
Instrument Transformer Co.
