

SPEC THE BEST

Doing it right means never leaving quality up to chance. In today's business environment, short-term cost savings can trump the long-term total cost benefits associated with higher quality. This leaves one system-critical area you can no longer leave to chance – the selection of your CTs.

All Meramec CTs are custom designed to your exact specifications, using only the highest quality components that are completely manufactured and assembled in the USA. The Meramec name is recognized for proven reliability (a 99.98% reliability rating) in product quality, technical service and 24/7 customer support.

When specifying your next circuit breaker, power transformer or generator, spec the best - SPEC MERAMEC.
